VERBAL DESCRIPTION: Very fragmented bark beater. All sides & grooves broken except one piece at flat side w/ in complete groove. One broad side is flat, the other is ground: groove about 2 cm in width, 2-3 cm deep; high parts about 0.2 cm. From the beveling & rounding on some broken edges I suspect this was used for a while after some initial breakage. There is also a poorly made groove on one broken edge. The original finished surface are highly polished in places. Gray to dark green rock, very fine textured. Something very fine in it sparkle. Not obvious.
